

Addendum to the Port Services Guide

Ship-Generated Waste Reception and Handling Plan

Update of Maximum Tariffs – MARPOL Convention 73/78 (Annex I)

Update to the maximum tariffs for the port reception facility service for liquid waste generated by ships (MARPOL Convention 73/78, Annex I) at the Port of Cádiz Bay

The Board of Directors of this Port Authority, at its meeting on 25 June 2026, has approved the update of the maximum tariffs for the port reception facility service for liquid waste generated by ships (MARPOL Convention 73/78, Annex I) at the Port of the Bay of Cádiz.

Updated Maximum Tariffs for the Port Service for the Reception of Liquid Waste (Annex I):

- Up to 15 m³: **€51.34/m³**
- Exceeding 15 m³: **€42.77/m³**

If the vessel does not have its own pumping equipment and the master requests the service provider to supply suction/pumping equipment, the applicable rate will be €213.87 per hour.

In cases where the transfer rate from the vessel to the road tanker is less than 5 m³ per hour, the service will be billed hourly, regardless of the volume discharged, at a rate of €213.87 per hour. This rate will apply under these circumstances, provided that the vessel's own pumping equipment is being used.

This update will take effect on the day following its publication on the Port Authority's notice board.
